

## 14-20-A-24 PlexStim C&C++ SDK (32-bit)

The PlexStim C&C++ SDK (software development kit) (32-bit) contains the files required to control the Plexon Stimulator from user-written C&C++ applications or from third-party applications (e.g. LabView) that can import the PlexStim dynamic link library (DLL).

Note: This version of the SDK is designed to control stimulators of revision F running firmware A. It will not recognize Stimulator hardware prior to revision F running firmware prior to revision A. Check the revision labels on the bottom of the stimulator and contact Plexon support for upgrade information if required. Please read the DLL change log for additional information.

### Contents:

DLL and support files, 64-bit, 14-20-A-21, version 2.3.19.0

- PlexStim.dll
- PlexStim.lib
- PlexStim.h
- PlexStimTypes.h

PlexStim DLL Change Log, 14-20-D-18.

Example Visual Studio Solution, 64-bit, 14-20-A-24

Guidelines for loading the PlexStim DLL into Labview, 14-20-D-19.

Revision	Description	Originator	Date
--	Initial version of C&C++ SDK under this part number	CDP	04-21-15
	Revised for version 2.3.19.0	CLH	08-26-22
